# Introduction.

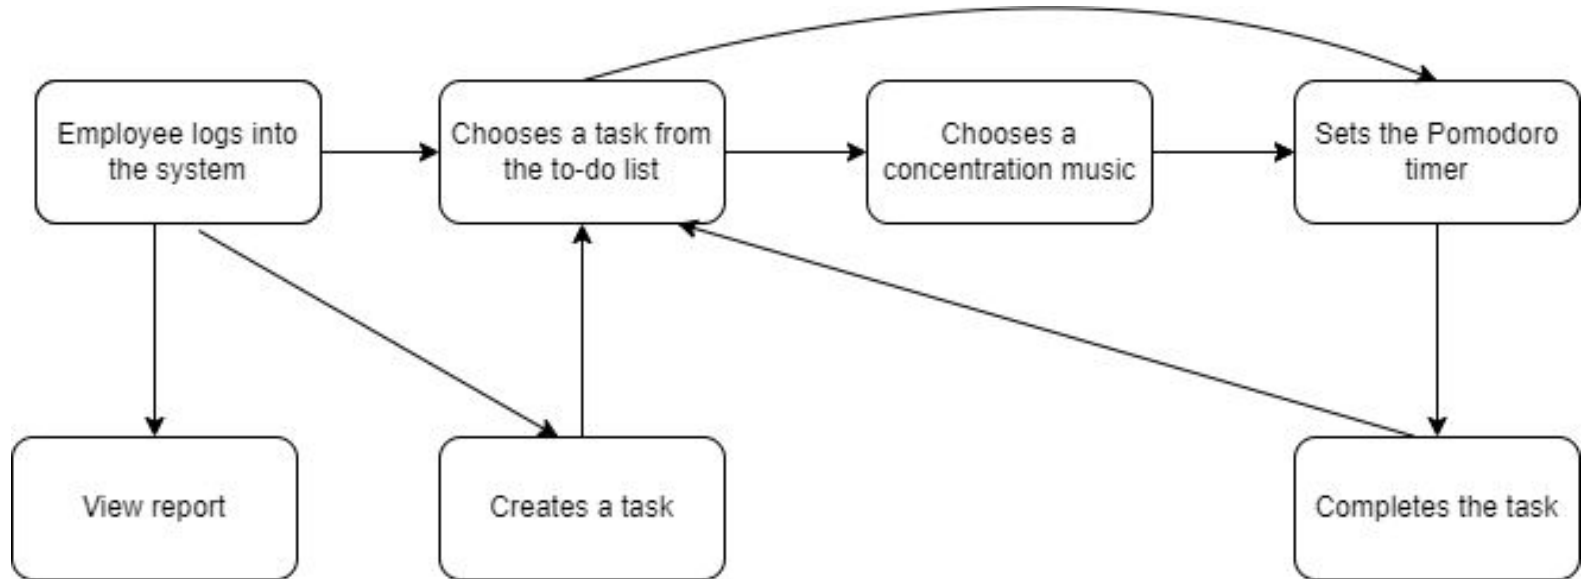

- Studies show that increase in employee productivity can contribute to greater profits for the company as well as increased employee satisfaction.
- Efficient productivity techniques would help the employees to perform well without burning out or compromising the quality of the software product.
- Our Employee Productivity System is designed to help employees track their tasks and manage their time more effectively.

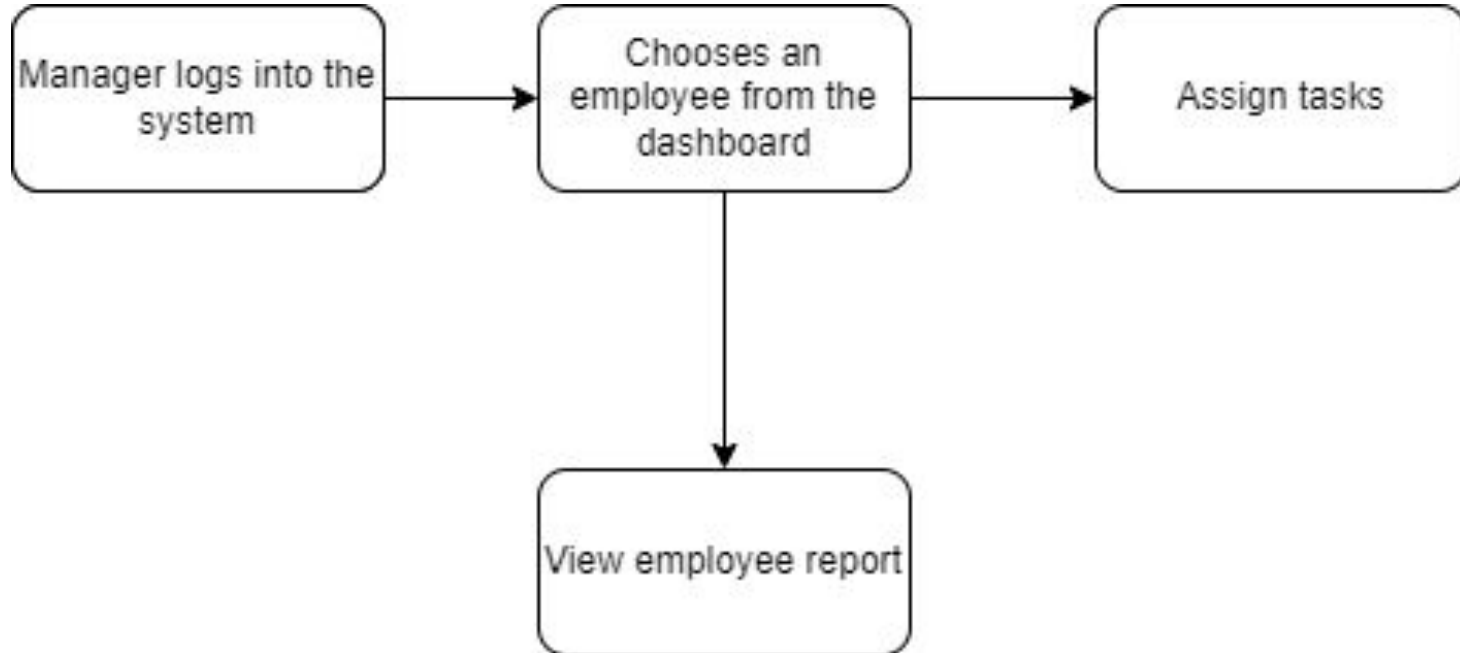

# Process Overview.

- **Tracking tasks:** Employees can create, prioritize, and mark tasks as complete through our task management interface.
- **Using the Pomodoro timer:** Employees can track their work sessions using the Pomodoro timer, which helps them stay focused and take breaks at regular intervals.
- **Listening to concentration music:** During work or during breaks, employees can choose to listen to concentration music to help them focus or relax.
- **Drowsiness detection:** In background, our system constantly checks if the employee is active or drowsy using ML techniques. The analysis is presented in the productivity report.
- **Viewing reports:** Employees and managers can view reports on employee productivity to help them identify areas for improvement and track progress over time.

# Class Diagram.

# Technology Stack.

## Minimum Software Requirements

- *Operating System* - Windows 7 or above
- *Frontend* - HTML, CSS, Javascript
- *Backend* - Firebase
- *Database* - Firebase Realtime Database (NoSQL DB)
- *Web Browser* - Firefox or Chrome

## Minimum Hardware Requirements

- *Processor* - Intel Pentium or above
- *Storage* - 200 GB
- *Display Type* - PC Display
- *Sound Card* - Required
- *Internet Connection* - Required

## Conclusion.

- Employee Productivity System is a powerful tool for helping employees track their tasks, manage their time, and stay focused and productive throughout the workday.
- With features such as a Pomodoro timer, to-do list, and concentration music, the software offers a range of benefits for both employees and managers.
- By using the system, companies can achieve higher levels of productivity, better task management, and a healthier work-life balance for their employees.

**Thank You.**
